TEAM MEMBER INFORMATION

INTRODUCTION

This guide was developed to assist evaluation team members prior to and during the onsite visit of a collision training program.

Team Member Instructions

As a team member, your primary responsibility is to determine how well a program meets the accreditation requirements outlined in the Program Standards and Collision Minimum Requirements.

During your review of a program, look at each item on the Collision Program Evaluation form relative to the stated goals of the program, the level of accreditation, <u>and</u> any available evidence (written, physical, etc.) that will assist you in reaching conclusions as to how well a standard is met.

Each item must be assigned a rating of 1 (not at all) to 5 (exceptional, above average) on the forms provided by the ETL. Evaluators must use their experience and careful observations when assigning a rating. When more than one person is rating an item, the ratings will be averaged. On items given a rating less than 4, it is essential that comments be made in order to justify your rating and to give suggestions for program improvement.

A low rating on a standard does not necessarily mean the program is deficient. The standards consist of elements that make up an ideal program. All programs will not have all elements. In your oral and written report, the seriousness of a discrepancy should be stated.

You may be assigned specific standards to review, but should communicate with the other team members for their opinion on questionable items. Make written comments of items that need correction.

When the item asks for a percent, list, or other information, include them in your written report.

Finally, compare your responses with the program's evaluation responses. If a discrepancy exists, you must talk to the instructional staff to determine the reason.

The following is an example of a procedure you will use to rate each standard:

The program may be seeking accreditation in the area of Painting and Refinishing. Item (8.2-B) states, "Rate the quantity of tools and equipment in terms of the quantity needed for efficient and effective instruction." To rate this item, you must look for evidence (the tools and equipment) and if you cannot see them, ask the faculty to show you. Be sure to check for all the tools and equipment listed in the Tools and Equipment section under Specialty Tools and Equipment - Painting and Refinishing in addition to Hand Tools and General Lab/Shop Equipment.

To determine how well a standard is met, you will use the following methods that include:

- interviews with teachers, administrators, students, former students, counselors, employers, or advisory committee members;
- examination of documentation materials provided by the program;
- review of the task list and curricular materials;
- verification of the tools and equipment;
- observation of instructional practices; and
- inspection of the facility.

As you go through the standards, make comments on strengths and where improvements are needed. On the first day, the team will meet informally to compare notes, assess the status of their work, and plan for the next day. During an initial accreditation visit, on the second day the team will go back to the school and complete the program review. The team will meet with the ETL to summarize their observations and record their evaluations on each of the standards.

Upon completion of your meeting with the ETL, the team will give an oral report to the administration and instructional staff. This oral report (due to time constraints) should include only those items in the standards that are deficient and those areas that are exemplary. At that time, the administration and faculty will be encouraged to express their views on the items under discussion. The items discussed in the oral report must also be outlined in the Summary of Debriefing. Therefore, you must have evidence to support your observations and recommendations on the standard under discussion.

TEAM MEMBER GUIDELINES

Be aware of the -"<u>HALO EFFECT</u>"- that is, simply because a program appears to excel in one area (e.g., tools and equipment), that does not mean that it excels in all other areas. Another example is a personable instructor. "Nice guys" do not necessarily mean that the program or area provides high quality training.

Be aware of <u>CONTRAST ERRORS</u> (e.g., they operate in a different manner than I do, therefore, they are wrong), <u>SIMILARITY ERRORS</u> (e.g., they operate like I do, or their methods are familiar to me, therefore, the program is good), and <u>FIRST IMPRESSIONS</u> <u>OF THE PROGRAM</u>. These types of errors can lead to false conclusions about overall program quality.

Interviewing Instructors and Administrators

- Such sessions are a major part of the evaluation process.
- Do not try to conduct a trial; rather, strive for a relaxed, informal atmosphere to clarify issues.
- Avoid thinking, "In my program..." or "At work..." You are evaluating another program against standards, not in comparison to your place of employment.
- Remain friendly and retain a positive attitude.
- <u>Do not</u> argue with an instructor, administrator, or staff member about the way something is done.
- Instructors may ask you how your program/shop operates. Answer them, but indicate other approaches may work just as well.

Classroom and Lab/Shop Visits

Team members should make classroom and lab/shop visits during evaluation, but there are points to remember.

- Instructors will be asked to conduct a class as usual during your visit; you should encourage this.
- Be as unobtrusive as possible.
- If you have questions or desire more information, spend a few minutes with the instructor when he/she is free.
- Save your comments for later meetings.

After the Visit

The goal of your visit is to determine if the program meets the standards. Another goal of your visit is overall program improvement. The staff and administration may or may not agree with your observations. However, your recommendations, if implemented, may improve the program.

After you leave the school, respect the confidentiality of your findings. Do not divulge your observations or program judgments following the visit.

The ASE Education Foundation staff appreciates your participation as a team member.

COLLISION REPAIR & REFINISH MINIMUM REQUIREMENTS

- 1. The minimum program requirements are identical for initial accreditation and for renewal of accreditation.
- 2. Programs must meet the following hour requirements based on the level of accreditation sought.

Damage Analysis/Estimating/Customer Service

- 46 hours combined classroom and lab-shop instructional activities
- Required for all accredited programs

Painting & Refinishing

- 300 hours combined classroom and lab-shop instructional activities

Non-Structural Analysis & Damage Repair

- 300 hours combined classroom and lab-shop instructional activities
- 75 additional hours of Welding, Cutting & Joining is also required

Structural Analysis & Damage Repair

- 185 hours combined classroom and lab-shop instructional activities
- Accreditation in Non-Structural Analysis & Damage Repair is also required

Mechanical and Electrical Components

- 200 hours combined classroom and lab-shop instructional activities

To achieve MASTER level of accreditation, programs are required to accredit in all areas.

- 3. The average rating on each of Standards 6, 7, 8, 9 and 10 must be a four on a five-point scale. The program will not be approved for an on-site evaluation if the average is less than four (4) on any of those standards. The program should make improvements before submitting the application to the ASE Education Foundation for review. A program will be denied accreditation if the on-site evaluation team average on Standards 6, 7, 8, 9 or 10 is less than four.
- 4. A "YES" response must be achieved on all six (6) criteria in Standard 12 if the program is using it to meet the instructional hour requirements for the purpose of accreditation. The program will not be approved for an on-site evaluation if it cannot support a "YES" response to each criterion on the program evaluation form. A program will be denied accreditation if the on-site evaluation team does not give a "YES" response to all six (6) criteria in Standard 12. This applies only to programs using the provisions in Standard 12 for the purpose of meeting instructional hour requirements.

- 5. A program may not be approved for an on-site evaluation if the average rating on Standards 1-5 and 11 is less than a four on a five-point scale. A program may be denied accreditation if the on-site evaluation team average rating on Standards 1 - 5 and 11 is less than four. Approval for on-site evaluation or accreditation will be made by the ASE Education Foundation, based on the number of standards rated at 4 or 5 as well as the individual rating on any standard rated less than four.
- 6. All instructors must hold current ASE certifications in the collision repair and refinish area(s) in which he/she teaches.
- 7. All instructors must attend a minimum of 20 hours per year of recognized industry update training relevant to their program.
- 8. The program Advisory Committee, consisting of at least 5 members, must conduct at least two working meetings a year. Minutes of the meetings must be provided to the on-site evaluation team for review and must reflect relevant areas of the standards as having been considered by the Advisory Committee.
- 9. The Program Standards recognize that program content requirements vary by program type and by regional employment needs. Therefore, flexibility has been built into the task list by assigning each task a priority type. Items on the Task List are broken down into two categories:
 - High Priority Individual (HP-I) is a task that requires students to demonstrate hands-on competency to the instructor on an individual (one-to-one) basis. Competency in HP-I tasks will indicate to employers that the graduate is skilled in that area. ASE program accreditation requires 95% of the HP-I tasks to be included in the curriculum.
 - High Priority Group (HP-G) is a task that can be taught through the use of video, demonstration, team training, etc. Students should be tested on the information presented, but is not required to demonstrate hands-on competency on an individual (one-to-one) basis. Competency in HP-G tasks will indicate to employers that the graduate has been tested on the information, but may not have "hands-on" competency skills. ASE program accreditation requires 90% of the HP-G tasks to be included in the curriculum.
- 10. A program that does not meet the minimum hour requirements may be eligible for accreditation if both of the following conditions are met for the areas of accreditation being sought:
 - a. Show evidence that all graduates from the previous academic year have taken the professional level ASE certification examination, and
 - b. Show documentation that 75% of those graduates passed the professional level ASE certification tests. **NOTE:** The ASE Entry-Level test cannot be used to meet this requirement.

11. The concern for safety is paramount to the learning environment. Each program has the following safety requirement preceding all related tasks:

Comply with personal and environmental safety practices associated with clothing, eye protection; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of chemicals/materials in accordance with local, state, and federal safety and environmental regulations.

 In 1998 the Occupational Safety and Health Administration (OSHA) issued a new rule on respiratory protection. The Occupational Safety and Health Standards, Title 29 Labor, Subpart I – <u>Personal Protective Equipment</u> requires employers to establish and maintain a respiratory protection program.

Since the health and safety of students is a primary concern, all collision programs that seek ASE program accreditation must have their Program Administrator and Program Instructor sign the Application for Accreditation or Renewal of Accreditation, where indicated, that the school is aware of this rule (including respirator fit testing and filter changing) and to the extent required by law, is in compliance with the rule with respect to the students enrolled in the Collision Repair and Refinish Program.

- 13. The ASE Education Foundation strongly encourages programs to review and comply with the Environmental Protection Agency (EPA) Design for the Environment (DfE) Project publications which can be accessed on the website at www.epa.gov/dfe/pubs/projects/auto.
 - 1. Best Practices for Auto Refinishers When Spray Painting
 - 2. Best Practices for the Paint Mixing Room
 - 3. Supplied-Air Respirators in Auto Shops: Get the Best Protection

Page 7 of 45

- 4. User Friendly Supplied-Air Respirators: Options for Auto Refinishers
- 5. Choosing the Right Gloves for Painting Cars
- 6. Additionally, EPA issued a Final Rule on the National Emission Standards for Hazardous Air Pollutants NESHAP (Subpart HHHHHH)_that the ASE Education Foundation recommends programs review: Paint Stripping and Miscellaneous Surface Coating Operations (found separately at http://www.epa.gov/ttn/atw/area/paint_stripb.pdf)

GO/NO GO STANDARDS

The Program Standards for Initial Accreditation and Renewal of Accreditation are identical. Items listed below are considered **Go/No Go** items, and are critical for accreditation and are in **bold** print in the Collision Repair & Refinish Program Evaluation materials.

<u>6.1A</u>	Does the Advisory Committee, consisting of at least five (5) members, convene a minimum of two working meetings per year?
<u>6.6B</u>	Is the Advisory Committee included when conducting an annual evaluation of the facilities to assure adequacy in meeting program goals?
<u>7.4A</u>	Does the collision repair and refinish program provide theory and "hands-on" training for 95% of the HP-I and 90% of the HP-G tasks, as evidenced by cross-referencing the course of study, lesson plans, job sheets, and student progress charts?
<u>8.1A</u>	Are all shields, guards, and other safety devices in place, operable, and used?
<u>8.1B</u>	Do all students, instructors, and visitors wear safety glasses in the lab/shop area while lab is in session?
<u>8.2A</u>	Are the tools and equipment available for the tasks taught in the program areas being accredited?
<u>10.1</u>	Do instructors hold current ASE certification appropriate for the program areas being accredited?
<u>10.3B</u>	Do instructors attend a minimum of 20 hours per year of recognized industry update training (or equivalent) relevant to the areas their program is accredited?

For programs using e-learning for the purpose of meeting accreditation instructional hour requirements, support for a "YES" response must be provided for each criterion below:

<u>12.1A</u>	Is there documentation that students have access to appropriate technology
	for e-learning purposes?
<u>12.2A</u>	Are the content/tasks that are to be delivered via e-learning clearly
	highlighted in the course of study?
<u>12.2B</u>	Is there documentation that e-learning is incorporated into the content/tasks
	in the program plan?
<u>12.2C</u>	Do the instructional hours to be credited toward meeting up to 25 percent of
	the program hour requirements correlate with the vendor's average
	completion time for each instructional module?
<u>12.2D</u>	Is there documentation of the implementation and use of e-learning
	instructional materials as evidenced in a Learning Management System
	(LMS)?
<u>12.3A</u>	Are Advisory Committee meeting minutes available to confirm that the
	committee has discussed and approved e-learning?

Programs must be able to support a "YES" response for all eight items (fourteen items if using Standard 12 - E-learning). Programs must also meet the hour requirements listed in item 2 of the Collision Repair and Refinish Minimum Requirements appropriate for the areas of accreditation sought. If these responses are not achieved, <u>do not apply for accreditation at this time.</u>

In addition, an on-site evaluation will not be scheduled unless the <u>average score</u> on each of Standards 6, 7, 8, 9, and 10 is at least a 4 on the Program Evaluation. Please refer to the Collision Repair and Refinish Program Requirements for more information.

Instructors must be ASE certified in accordance with the requirements for the program areas being accredited. Please refer to item 6 of the <u>Collision Repair and</u> <u>Refinish Minimum Requirements</u>.

TOOLS AND EQUIPMENT

Local employer needs and the availability of funds are key factors for determining each program's structure and operation. The ASE Education Foundation Program Standards recognize that not all programs have the same needs, nor do all programs teach 100 % of the tasks. Therefore, the basic philosophy for the tools and equipment requirement is as follows: *for all tasks which are taught in the program, the training should be as thorough as possible with the tools and equipment necessary for those tasks*. In other words, if a program does not teach a particular task, the tool from the tool list associated with that task is not required.

The tool lists are organized into three basic categories: *Hand Tools, General Lab/Shop Equipment,* and *Specialty Tools and Equipment by area.* The specialty tools section is further separated into categories. When referring to the tools and equipment list, please note the following:

- A. The organization of the tool list is not intended to dictate how a program organizes its tool crib or student tool sets (i.e., which tools should be in a student set, if utilized, and which should be in the tool crib or shop area).
- B. Quantities for each tool or piece of equipment are determined by the program needs; however, sufficient quantities to provide quality instruction should be on hand.
- C. For *Specialty Tools and Equipment*, the program need only have those tools for the areas being accredited.
- D. Programs may meet the equipment requirements by borrowing special equipment or providing for off-site instruction (e.g., in a dealership or independent repair shop). Use of borrowed or off-site equipment *must* be appropriately documented.
- E. No specific brand names for tools and equipment are specified or required.
- F. Although the Program Standards recommend that programs encourage students to begin to build their own tool sets, this is not a requirement. Industry surveys indicate that most (90%) employers require that a candidate for employment provide his/her own basic hand tool set in order to be hired as an entry-level technician.

HAND TOOLS

(Contained in individual sets or the tool crib in sufficient quantities to permit efficient instruction)

Adjustable Wrenches – 6" and 12"	Inspection Mirror
Allen (Wrench or Socket) Set - Standard (.050" - 3/8")	Pickup Tool – magnetic and claw type
Allen (Wrench or Socket) Set - Metric (2mm - 7mm)	Pliers:
Chisel Set	Combination
Combination Wrenches:	Hose Clamp
Standard (1/4" - 1") (optional)	Locking Jaw
Metric (7mm - 24mm)	Needle Nose
Crowfoot Wrench Set – Metric (optional)	Side Cutting
Crowfoot Wrench Set – Standard (optional)	Slip Joint (Water Pump)
Drill - 3/8" and 1/2" variable speed, reversible	Snap Ring Plier Set – internal and external
Flare Nut (tubing) Wrenches:	Punch Set
Standard 3/8" - 3/4" (optional)	Screwdriver – Blade Type:
Metric (10mm - 17mm)	Stubby
Flashlight and batteries	6", 9", 12"
Hack Saw and blades	Offset
Hammers:	Screwdrivers – Phillips:
16 oz. Ball Peen	Stubby #1, #2
Brass	6" #1, #2
Dead Blow Mallet	12" #3
Plastic Tip	Offset #2
Sledge	Screw Extractor Set
Soft Faced	Screw Starter:
Rubber Mallet	Phillips
Impact Wrenches - 3/8" and 1/2"	Standard

Hand Tools (cont.)		
Socket Set - 1/4" Drive:	Torque Wrenches (Sound/Click)Type:	
1/4" - 1/2" Standard Depth (optional)	3/8" Drive in. lb. (30 – 250)	
1/4" - 1/2" Deep (optional)	3/8" Drive ft. lb. (5 – 75)	
6mm - 12mm Standard Depth	1/2" Drive ft. lb. (50 – 250)	
6mm - 12mm Deep	Torx® Set:	
Flex/Universal Type – Metric (standard optional)	T8, T10, T15, T20, T25, T27, T30, T40, T50, T55	
Universal Joint	Torx® External Set:	
3", 6" Extensions	E8, E10, E15, E20, E27, E30, E40, E45, E50, E55	
Ratchet		
Socket Set - 3/8" Drive:		
5/16" - 3/4" Standard Depth (6 point) (optional)		
3/8" - 3/4" Deep (6 point) (optional)		
9mm - 19mm Standard Depth		
9mm - 19mm Deep		
3", 6", 12", 18" Extensions		
Flexhead Ratchet		
Impact Sockets - 3/8" - 3/4" Standard (optional)		
Impact Sockets - 10mm - 19mm		
Ratchet		
Universal Joint		
Socket Set - 1/2" Drive:		
7/16" - 1 1/8" Standard Depth (optional)		
7/16" - 1 1/8" Deep (optional)		
10mm - 25mm Standard Depth		
10mm - 25mm Deep		
5", 10" Extensions		
Flex Handle (Breaker Bar)		
Impact Sockets Standard 7/16" - 1 1/8" (optional)		
Impact Sockets 12mm - 32mm		
Ratchet		

GENERAL LAB/SHOP EQUIPMENT

The tools and equipment on this list are used in general lab/shop work but are not generally considered to be individually owned hand tools. A well-equipped, accredited program should have all these general tools and equipment readily available and in sufficient quantity to provide quality instruction.

Air Blow Guns – OSHA Standard	Sponges
Air System – Air Compressor	Step Ladder
Air Hoses – with quick release couplings	Storage Cabinets
Air Lines	Towels
Regulator	Trash Cans in accordance with local, state, and federal regulations
Water Extractors	Trouble/Work Lights – non-incandescent
Air Transformer/Regulators	Wet/Dry Shop Vac
Chamois (synthetic)	Water Hose
Coolant Drain Pan	Water Hose Nozzle
Corrosion Protection Application Equipment	Work Benches – steel top with vice
Creepers	Work Stands – portable
Grounded Extension Cords	Wheel Caster System (Wheel Dollies)
Heat Lamp	
Hood Props	
Infrared Non-Contact Thermometer	
Jack Stands	
Oil Drain/Storage Pan	
Overhead Ventilation – for welding area	
Part Cart	
Pressure Washer (optional)	
Service Jacks	
Shop Brooms	
Dust Pans	
Floor Squeegee	
Floor Mop and Bucket	

SPECIAL SAFETY ITEMS

(All equipment must meet or exceed federal, state, and local regulations.)

Bloodborne Pathogen Kit	
*Ear Protection – for students, instructors, and visitors	
Eye Wash Basin	
Eye Wash Station, portable (saline)	
Fire Extinguishers – by type as required	
First Aid Kit (per written first aid policy)	
Flammable Material Storage Locker – meeting fire and building codes	
Hazardous Spill Response Kit	
Hybrid/Electric Vehicle Safety Kit (optional)	
Lineman Gloves (for use with hybrid vehicles)	
OSHA "Right to Know" Compliance Kit	
Protective Gloves and Clothing – for handling paint and related	
chemicals	
Respiratory Protection Equipment – as required by OSHA	
Safety Cans - for solvents, rags, etc.	
*Safety Glasses, Clear and Tinted Face Shields, and Goggles - for	
students, instructors, and visitors	
*Safety Shoes – as required	
Safety Shower – as required	
Vacuum System – for air sanders – dust extraction vacuum – stand alone	
or central system (recommended)	

* = Individual Student Items

MISCELLANEOUS TOOLS

Caulking Gun	Special Removing and Releasing Tools:
C-clamps – assorted	Door handle removing tool
	Miscellaneous interior and exterior trim removing
Heat Gun	tools
Hole Saw Set - 1/2" to 2"	Moulding removal tools
Oil Can (Pump Type)	Spring lock line removal tool set (A/C, fuel line, etc.)
Panel Splitter (hand held blades/accessories)	Stationary glass removal tools (optional)
Pry Bar Set	Windshield wiper removing tool
Putty Knife	
Rivet Guns – heavy duty blind and large for 3/16" and 1/4"	
Sanding Tools – assorted	
Scrapers	
Scratch Awl	
Tap and Die Sets – Metric (standard optional)	
Tape Measure – Standard and Metric	
Tin Snips	
Tire Pressure Gauge	
Tire Inflator	
Twist Drill Sets:	
Standard - 1/64" - 1/4" by 1/16" and Metric Equivalent	
Standard - 1/4" - 1/2" by 1/16" and Metric Equivalent	
Wire Brushes – hand and powered	

BODY WORKING TOOLS

	Filler Spreaders and Applicators – assorted types and
Assorted files – for metal and plastic finishing, including:	sizes
Body Files	Picks – assorted
Hand Sanding Pads	
	ALUMINUM REPAIR TOOLS
Metal Files	(RECOMMENDED)
Mixing Board	Abrasives
Sanding Blocks (short and long)	Body Files
Sanding Boards (short and long)	Dedicated (Clean) Repair Station
Body Hammers:	Dent Pulling Equipment
Cross Chisel	Dollies
Door Skin Hammer	Dye Penetrant
General Purpose Pick	GMAW Welder Synergic Pulse
Large Face Finishing	Hammers
Long Pick	Self-Piercing Rivet Guns
Short Utility Pick	Stainless Steel Wire Brush
Shrinking	Wet or Dry Dust Extraction System approved for aluminum
Dollies:	
Bumping File	
Dinging Spoon	
Door skin Dolly	
Fender Dolly	
Inside Heavy Duty Spoon	
Inside High Crown	
Spoon Dolly ("Dolly on a stick")	
Toe Dolly	
Universal Dolly	
Page 16 of 45	Effective 1/1/2022

Revised 1/11/2022

SPECIALTY TOOLS AND EQUIPMENT

This section covers the tools and equipment a lab/shop should have for training in any given specialty area. This equipment is specialized and it must be available in the lab/shop or to the program. No specific type or brand names are identified because they will vary in each local situation.

For all tasks which are taught in the program, the training should be as thorough as possible with the tools and equipment necessary for those tasks. In other words, if a program does not teach a particular task, the tool from the tool list associated with that task is not required.

Air Amplifier/Venturi style blower used to dry waterborne paint	Paint Storage Room/Locker in accordance with local,
(optional)	state, and federal regulations
	Personal Safety Equipment (painting gloves, suits,
Air Cap Test Gauge (optional)	hoods, respirators, etc.)
Color-matching Light System	Portable Paint Curing Equipment (infrared)
Electronic Dry Film Thickness Gauge with a + or - of 1/10th of a mil	
thickness capabilities (ferrous/non-ferrous)	Positive Pressure Air Respirator
Enclosed Paint Spray Booth to comply with local, state and federal	
regulation (downdraft booth recommended)	Power Sanders
	Prep Station - (recommended) in accordance with local,
Gun Washer for Waterbase (Optional)	state, and federal regulations
Hand Sanding Pads	Sanding Blocks (short and long)
	Spray Guns – HVLP (high volume low pressure) or
Masking Equipment -	compliant with high air flow fittings
	Spray gun cleaning equipment or disposal liner cup
	system in accordance with local, state, and federal
Car Covers	regulations
Paper and Tape Dispenser	Ultrasonic film thickness gauge – plastic (optional)
Wheel Covers	UV Curing Light (optional)
Paint Mixing Bank with Measuring Equipment	Variable Speed Buffer/Polisher
Paint Mixing Room (in accordance with local, state, and federal	
regulations)	Viscosity Cups
	Waste disposal/recycle program in accordance with
Paint Shaker	local, state, and federal regulation
Paint Stand (assorted)	Waterborne Spray Gun Equipment (optional)

PAINTING AND REFINISHING

Page 17 of 45

Effective 1/1/2022 Revised 1/11/2022

NON-STRUCTURAL ANALYSIS AND DAMAGE REPAIR (BODY COMPONENTS)

Abrasive Cut-off Tool and Discs	Panel Splitter	
Anchoring System (recommended)	Slide Hammer – complete with attachments	
Car Lift (capable of totally lifting the vehicle) (recommended)	Stationary Power Tools:	
Glue Hole Equipment (optional)	Bench Grinder	
GMAW Welders and accessories (flow meter, cart, gas cylinder,		
nozzle cleaner) 180M minimum (recommended)	Drill Press (recommended)	
Heat Shrinking Tool	Welding Safety Equipment – to include:	
Plasma Cutting Torch (recommended)	Aprons	
Plastic and Adhesives Tools:	Face Shields	
Plastic Welder	Gloves	
Die Grinding Tool Set	Goggles	
Disc Grinder - 3"	Helmets	
Structural Adhesives Guns (dispenser) – two-component	Jackets	
Portable Hydraulic Ram – with attachments	Respirators	
Portable Power Tools:	Safety Glasses	
Abrasive Blaster and appropriate personal safety equipment		
(recommended)	Skull Cap	
Eraser Wheel	Welding Blanket	
Grinders	Welding Pliers	
Hole Punch	And all appropriate safety equipment	
	Squeeze-type Resistant Spot Welder (STRSW) (9,000	
	amp/344 deca newton inverter technology)	
Metal Shears (optional)	(recommended)	
Mini Belt Sander for removal of plug welds	Weld-on Pulling Tool and Attachments	
Nibbler (optional)		
Power Reciprocating Saw and Blades		
Sanders		
Spot Weld Removal Tool (optional)		

Page 18 of 45

STRUCTURAL ANALYSIS AND DAMAGE REPAIR

Everything listed under Non-Structural Analysis and Damage Repair (Body Components) plus:

Blind Rivet Tool 3/16" – 1/4" (3,822 lbf. Minimum)	Pulling and Holding Equipment Set:	
Body over frame and unibody anchoring systems	Body Clamps (recommended)	
Frame/Unibody Straightening Equipment – Bench/rack system with		
multiple pull capacity	Safety Chains/Cables	
GMAW (Pulse) Welder and accessories (flow meter, cart, gas		
cylinder and nozzle cleaner) 220 Volt 180 amps	Sill Clamps (recommended)	
	Three-dimensional Measuring System with the	
Heat Monitoring Crayons	capability to measure the total vehicle.	
	Tram Gauges	

MECHANICAL AND ELECTRICAL COMPONENTS

A/C Recycle/Recovery Machine (optional)	Jumper Wire Set (with various adapters)
	Laptop with applicable Diagnostic Software & Tools or
AGM Battery Charger compatible – with boost capability (optional)	Scan Tool with OBDII capabilities
Battery Post Cleaner	Oil Filter Wrenches
Battery Terminal Pliers	Plugs and Caps for Hydraulic, Fluid, and A/C lines
Battery Terminal Puller	Portable Battery Jump Box
	Pressure Bleeder/Scan Box for bleeding antilock
Brake Bleeder – vacuum assisted	braking system
Brake Spoon	Soldering Gun/Iron
	Torx ® Tamper Proof Set: T8, T10, T15, T20, T27,
Connector Pick Tool Set	T30, T40
	Vac and Fill equipment to extract fluids (oil,
Coolant Tester	transmission, etc.
Cooling System Pressure Tester	Wheel Alignment System (4-wheel) (optional)
DMM (Digital Multimeter)	Wire and Terminal Repair Kit
Flexible Dial Indicator Gauge (optional)	

FORMS COLLISION REPAIR & REFINISH PROGRAM EVALUATION FORM

School/Program Name:

City and State: ____

Accreditation Areas Sought:

- Damage Analysis/Estimating/Customer Service 46 hours* minimum (Required)
- Painting & Refinishing 300 hours* minimum
- Non-Structural Analysis & Damage Repair 300 hours + 75 additional hours of Welding, Cutting & Joining – 375 hours* minimum
- Structural Analysis & Damage Repair 185 hours* minimum. Accreditation in Non-Structural Analysis & Damage Repair is required

Mechanical and Electrical Components – 200 hours* minimum

* Combined classroom and lab/shop instructional activities, plus work-based learning hours if Standard 11 applies and e-learning hours if Standard 12 applies.

Type: Initial Accreditation Renewal of Accreditation

Please use this form when conducting a program evaluation.

POSSIBLE DOCUMENTS: These helpful hints are provided to assist the program prepare for the accreditation process and on-site visit. These suggestions are meant as examples of items that may be used to support the rating.

For all items requiring responses on a 5-point scale, use the following to rate your responses:

1	2	3	4	5
not at all	very little	somewhat, needs	average,	above average

STANDARD 1 - PURPOSE

THE COLLISION REPAIR & REFINISH TECHNICIAN TRAINING PROGRAM SHOULD HAVE CLEARLY STATED PROGRAM GOALS, RELATED TO THE NEEDS OF THE STUDENTS AND EMPLOYERS SERVED.

1.1 EMPLOYMENT POTENTIAL

1.1

The employment potential for collision repair & refinish technicians, trained to the level for the specialty or general areas outlined in the program goals, should exist in the geographic area served by the program.

- A. Rate the administration and use of an annual survey of employers to determine the needs of their potential employees.
- B. Rate the administration and use of an annual program completer survey to determine the percentage of students who are about to complete the program and obtain employment in the automotive industry or continue automotive education.

POSSIBLE DOCUMENTS: A. - B. Provide a copy of the annual survey and a summary of the results.

1.2 PROGRAM DESCRIPTION/GOALS

1.2

2.1

N/A

The written description/goals of the program should be shared with potential students and may include admission requirements if applicable, employment potential, area(s) of specialty training offered, and the cost of all tuition and fees. Technical qualifications of the faculty and the overall goal(s) of the program should also be included.

- A. Rate the program material(s) available (brochure, catalog, or website) on the inclusion of the following (rate collectively not individually):
 - 1. admission requirements (if applicable)
 - 2. employment potential
 - 3. areas of collision repair & refinish training offered
 - 4. cost of tuition and fees (if applicable)
 - 5. technical qualifications of the instructional staff
 - 6. overall goals of the program

POSSIBLE DOCUMENTS: A. Provide a copy of the brochure and/or catalog with appropriate pages identified (use sticky notes, highlighter, etc. to make the information easy to find). **For items rated above or below a 4 – provide explanation below:**

Standard 1 Average Score (<mark>3</mark> items)

STANDARD 2 – ADMINISTRATIVE PROGRAM SUPPORT

PROGRAM ADMINISTRATION SHOULD ENSURE THAT INSTRUCTIONAL ACTIVITIES SUPPORT AND PROMOTE THE GOALS OF THE PROGRAM.

2.1 ADMINISTRATIVE SUPPORT

Positive administrative support from institutional and local governing bodies should be demonstrated. Indicators of administrative support would include: support for staff in-service and update training; provision of appropriate facilities; up-to-date tools, equipment, training support materials, curriculum and support of continuing program improvement.

- A. Rate the administrative support for implementing the on-site evaluation team recommendations made at the previous on-site evaluation. N/A for initial accreditation only required to be rated for renewal accreditation.
- B. Rate the administrative support that demonstrates provisions have been made for instructors to attend planned in-service and update training on a regular basis.
- C. Rate the administrative support in terms of providing necessary resources to ensure the program is supplied with adequate tools, equipment, and service publications required to meet program goals and objectives.

D. Rate the administrative support for on-going curriculum development, review, and revision. E. Rate the extent to which the institution administration involves the program faculty in preparation of the annual budget. F. Rate the extent to which the institution administration is involved in and attends the program advisory committee meetings. **POSSIBLE DOCUMENTS:** A. - F. Provide a copy of the purchase order, school policy or letter of support from the administration that addresses the various issues of planned in-service and update training; tools, equipment, and service publications; curriculum; and budget preparation. **2.2 WRITTEN POLICIES** 2.2 Written policies should be adopted by the administration and policy board for use in decisionmaking situations and to provide guidance in achieving the program goals. Policies regarding safety, liability, and lab/shop operation should be written and prominently displayed as well as provided to all students and instructors. A. Have written policies regarding student and institutional responsibilities been approved by the administrative and/or policy YES board? B. Rate the written policies regarding safety, liability, and lab/shop operation in terms of being prominently displayed in the lab/shop area. C. Rate the policies in terms of being provided to each student and instructor. D. Rate the availability of a written policy approved by the school administration on First Aid administration and the instructors' knowledge of these procedures. POSSIBLE DOCUMENTS: A. - D. Provide a copy of the school policy and teacher/student handbook with pages marked with sticky notes and references highlighted. **2.3 PROVISIONS FOR INDIVIDUAL DIFFERENCES** 2.3The training program should be structured in such a manner that students with different levels of cognitive and psychomotor skills can be accommodated. A. Rate the structure of the training program to accommodate students with different levels of cognitive and psychomotor ability. POSSIBLE DOCUMENTS: A. Provide ADA information (if applicable), equipment modifications, differential instruction, and provide an example of Individual Education Plan (IEP).

Standard 2 Average Score (as many as 10 items) **STANDARD 3 - LEARNING RESOURCES** SUPPORT MATERIAL, CONSISTENT WITH BOTH PROGRAM GOALS AND PERFORMANCE OBJECTIVES, SHOULD BE AVAILABLE TO STAFF AND STUDENTS. **3.1 SERVICE INFORMATION** 3.1 Service information with current manufacturer's service procedures and specification data for vehicles manufactured within the last ten (10) years should be available. This information should be accessible to students in the lab/shop area. A. Rate the availability of pertinent electronic service information to students in the lab/shop area with procedures and specifications for vehicles manufactured within the last 10 years. POSSIBLE DOCUMENTS: A. State the location of all service information such as manuals, CDs, on-line access. etc. **3.2 MULTIMEDIA** 3.2 Appropriate up-to-date multimedia materials and technology should be readily available and utilized in the training process. A. Rate the use of current multimedia technology and equipment in the training process as appropriate. B. Rate the availability of multimedia equipment and materials for instructional purposes. POSSIBLE DOCUMENTS: A. – B. Provide a list and give the location of all technology available for student and instructor use. **3.3 STUDENT RESOURCES** 3.3 Pertinent instructional texts, resources, and e-learning materials should be available for each student to satisfy the objectives of the mode of instruction used. Basic and specialty learning resources should have copyright dates that are not over six (6) years old. A. Rate the pertinent instructional texts, resources and e-learning materials available for each student in terms of satisfying the objectives of the mode of instruction. Basic and specialty learning resources should have copyright dates that are not over six (6) years old.

B. Rate the general and technical automotive magazines, newspapers, and websites available for student and instructor use in terms of being current.

POSSIBLE DOCUMENTS:

A. Provide a copy of each textbook or online/electronic texts, and other materials used for instruction. B. Provide a list, give the location, and show examples of physical copies.

For items rated above or below a 4 – provide explanation below:

Standard 3 Average Score (5 items)

<u>STANDARD 4 – <mark>FUNDING</mark></u>

FUNDING SHOULD BE PROVIDED TO MEET THE PROGRAM GOALS AND PERFORMANCE OBJECTIVES.

4.1 FUNDING

4.1

Adequate funding should be allocated and used for the operation of the program. The funding should be allocated by the institutional administration in conjunction with the program faculty with input from the advisory committee. Funding reports should be made available to program staff.

A. Rate the funding in terms of being adequate for program operation.

B. Rate the extent to which the program staff input is included in funding planning.

C. Rate availability of funding status reports to instructional staff.

POSSIBLE DOCUMENTS:

A. Highlight pertinent discussion regarding funding in Advisory Committee minutes.

B. Provide copies of funding or budget requests. The evaluation team may interview program staff.

C. Provide a copy of the budget or funding report.

For items rated above or below a 4 – provide explanation below:

Standard 4
Average Score (3 items)

STANDARD 5 - STUDENT SERVICES

SYSTEMATIC COUNSELING SERVICES, PLACEMENT, AND FOLLOW-UP PROCEDURES SHOULD BE USED.

5.1 PRE-ADMISSION PROGRAM ADVISEMENT

Prior to program admission, a student should be counseled regarding automotive careers.

A. Rate the use of student advisement on automotive career opportunities and career exploration activities prior to program admission.

POSSIBLE DOCUMENTS: A. Highlight access to the career process and student services available, as cited in catalog or other materials.

5.2 PLACEMENT

A student placement process should be used to assist students in obtaining employment in industry, related to their training.

 A. Rate the placement process used to assist students obtain employment or workbased learning in the industry.

POSSIBLE DOCUMENTS: A. Provide the policy or explanation of the placement process.

5.3 ANNUAL GRADUATE FOLLOW-UP

A follow-up system should be used to determine graduates' employment location and for feedback regarding the efficiency, effectiveness, and appropriateness of training. The follow-up procedure should be designed to assure feedback regarding needed additions to or deletions from the training program including instruction, tools, and equipment. Follow-up of graduates employed outside of the collision repair & refinish industry should indicate reasons for non-collision repair service employment. When applicable, this information should be used to modify the training quality and/or content.

- A. Rate the annual formal follow-up system used to determine graduates' employment location or continuing education.
- B. Rate the annual follow-up procedure/survey used to obtain the graduates assessment of the efficiency and effectiveness of their training.
- C. Rate the annual follow-up procedure/survey in terms of obtaining feedback regarding needed additions or deletions to the training:
 - 1. instruction
 - 2. program/skills learned
 - 3. tools and equipment
- D. Rate the annual follow-up system used to obtain information from program graduates who are employed outside of the automotive industry.
- E. Rate the use of the information from annual follow-up procedures/survey to modify the training program.

5.3

5.1

POSSIBLE DOCUMENTS:

A. - D. Provide an explanation and a sample document (e.g., Graduate Surveys).

E. Describe the procedure to use the information obtained in follow-up and give an example of changes made to program based on feedback, if available.

For items rated above or below a 4 – provide explanation below:

Standard 5 Average Score (<mark>9</mark> Items)

STANDARD 6 – ADVISORY COMMITTEE

AN OFFICIALLY SANCTIONED PROGRAM ADVISORY COMMITTEE MUST BE USED TO PROVIDE INPUT ON PROGRAM GOALS

6.1 MEMBERSHIP

An Advisory Committee of at least five (5) industry members in attendance (not counting school personnel or educators from other programs), must convene at least two (2) working meetings a year to provide information, counsel, and recommendations on behalf of the community served by the training program. This Committee should be broadly based and include former students, employed technicians, and employers. Members of the Advisory Committee should not all be from the same business.

A. Does the Advisory Committee, consisting of at least 5 members in attendance (not counting school personnel or educators from other programs) convene a minimum of two working meetings per year? (GO/NO GO REQUIREMENT)

B.	Rate the input of committee members in terms of participation, providing input
	on program improvement, and attendance as indicated in the minutes.

C.	Rate the mix of committee members in terms of being inclusive of all industry
	sectors by representing at least the following groups: (rate collectively not
	individually)

- 1. collision repair & refinish technicians
- 2. local employers
- 3. former students
- 4. others (automotive trainers, parents, educators from other programs, etc., please specify)

POSSIBLE DOCUMENTS: A. – C. Agendas and meeting minutes from at least two meetings per year (one year for initial accreditation; five years for reaccreditation), including sign in sheets with advisory committee members affiliations.

6.1

YES

NO

6.2 REVIEW OF STUDENT SURVEYS	6.2
The Advisory Committee should provide input and review student survey	<mark>s.</mark>
A. Rate the use of the Advisory Committee review of student surveys	in the
evaluation process.	
POSSIBLE DOCUMENTS: A. Highlight pertinent discussion in Advisor	y Committee Meeting
minutes.	
6.3 REVIEW OF PROGRAM FUNDING	6.3
The Advisory Committee should provide input and review funding.	
A. Rate the Advisory Committee input in reviewing funds allocated to the program.	o and used by
B. Rate the Advisory Committee input on whether the funding is ade program operation.	quate for
POSSIBLE DOCUMENTS: A. Highlight pertinent discussion in Advisory Committee meeting minute B. Provide funding information and highlight pertinent discussion regardi Advisory Committee minutes.	s. ng <mark>adequacy of funding</mark> in
6.4 REVIEW OF GRADUATE FOLLOW-UP AND EMPLOYER SU Information gathered from the annual follow-up of program graduates and be reviewed by the Advisory Committee to assess employment potential a program modifications.	RVEYS 6.4 I employer surveys should and provide input on
A. Rate the Advisory Committee's review of information from the an up completed by the graduate and employer surveys and resulting recommendations for modifications to the training program.	nual follow-
POSSIBLE DOCUMENTS: A. Describe the annual review process and p the annual survey data and Advisory committee minutes with pertinent interview.	provide an example from formation highlighted.
6.5 REVIEW OF COURSE OF STUDY The Advisory Committee should provide guidance and approve all tasks <i>a</i> the mandatory task list required for the program accreditation level being	6.5 added to <mark>or removed from</mark> sought.
A. Rate the use of the Advisory Committee to provide input on the addition/deletion of tasks and its approval of task changes.	
POSSIBLE DOCUMENTS: A. Highlight pertinent discussion in Advisor	ry Committee meeting

minutes.

6.6 **REVIEW** OF TOOLS, EQUIPMENT, AND FACILITIES

The Committee should conduct annual inspections of tools and equipment to assure that they are up-to-date and comparable to industry standards for quality and safety. The Advisory Committee should review information from safety inspections and conduct an annual evaluation of the facilities to assure compliance with local, state and federal safety and environmental rules and regulations. Additionally, the committee should review all safety practices for appropriateness in meeting program goals.

- A. Rate the Advisory Committee use of the annual review process to provide input on maintaining up-to-date tools and equipment.
- B. Is the Advisory Committee included when conducting an annual evaluation of the facilities to assure safety and adequacy in meeting program goals? (GO/NO GO REQUIREMENT)

POSSIBLE DOCUMENTS: A. – B. Highlight pertinent discussion in Advisory Committee meeting minutes.

For items rated above or below a 4 – provide explanation below:

Standard 6 Average Score (as many as <mark>8</mark> items)

STANDARD 7 – INSTRUCTION

INSTRUCTION MUST BE SYSTEMATIC AND REFLECT COLLISION REPAIR & REFINISH PROGRAM GOALS. A TASK LIST AND SPECIFIC PERFORMANCE OBJECTIVES WITH CRITERION REFERENCED MEASURES MUST BE USED.

7.1 PROGRAM

The training program should progress in logical steps, provide for alternate sequences, where applicable, and be made available to each student.

A. Rate the training program in terms of what is taught (scope) and when it's taught (sequence) being logically ordered.

POSSIBLE DOCUMENTS: A. Provide a copy of the course of study.

7.2 PREPARATION TIME

Adequate time should be provided for teacher preparation and program development.

A. Rate the instructor's schedule in terms of providing adequate time for planning.

POSSIBLE DOCUMENTS: A. Show a copy of the Master Schedule and instructor office hours.

YES

NO

7.1

7.3 TEACHING LOAD

The instructor/student ratio and class contact hours should allow time for interaction on a one-toone basis. A safe working environment should be considered when determining teacher/student ratio.

A. Rate the average instructor/student ratio for the current year and a) past year for initial accreditation or b) past 5 years for renewal, in terms of being educationally sound and maintaining a safe environment.

POSSIBLE DOCUMENTS: A. Show student enrollment sheets, indicate the number of training stations, and identify teaching assistants (if any).

7.4 COURSE OF STUDY

7.4

All tasks have been given a priority rating. At least ninety-five percent (95%) of the tasks designated as High Priority – Individual (HP-I) must be taught in the course of study. At least ninety percent (90%) of the tasks designated as High Priority – Group (HP-G) must be taught in the course of study.

Instruction on the legal aspects and responsibilities of the collision repair & refinish technician in areas such as Environmental Protection Agency regulations, safety regulations, OSHA regulations, and other appropriate requirements must be included in the course of study. Instruction and practice in filling out work order forms, ordering parts, and basic record keeping should be a part of the training program. Tools and equipment must be available to perform the tasks in each of the areas for which accreditation is requested.

A. For the areas of accreditation being sought, does the program provide theory and "hands-on" training for at least 95% of the HP-I and 90% of the HP-G tasks, as evidenced by cross-referencing the lesson plans, job sheets, and student progress charts? (GO/NO GO REQUIREMENT)

Complete only the areas of accreditation being sought	95% - HP-I	90% - HP-G
Damage Analysis/Estimating/Customer Service	YES NO	YES NO
Painting & Refinishing	YES NO	YES NO
Non-Structural Analysis & Damage Repair (must include Welding, Cutting, & Joining)	YES NO	YES NO
Structural Analysis & Damage Repair	YES NO	YES NO
Mechanical & Electrical Components	YES NO	YES NO

B.	Rate the	course of study	in terms of including instruction on:

1.	Safety regulations the student may encounter upon employment	
2.	Legal responsibilities of the technician regarding Environmental	
	Protection Agency regulations	
3.	Other appropriate requirements which may affect their on-the-job	
	activities	
4.	Identification and proper use of appropriate tools and test and	
	measurement equipment	
5.	Use of current service information and industry publications	
6.	The inclusion of tasks on filling out work order forms, ordering parts, and	
	recording the time spent on task.	
SIBL	E DOCUMENTS:	
coss r	eference lesson plans, job sheets and student progress instrument to the cour	rse of study.
ovide	e syllabus (with information highlighted), course descriptions, lesson plans,	job sheets,
nt m	aterials, samples of work order forms, parts order form, and show how time	spent on task
orde	d. Refer to the <u>New Instructor Guide</u> for possible examples.	
ERF	ORMANCE STANDARDS AND STUDENT PROGRESS	7.5
nstruc	ction should be performance based, with an acceptable performance standarc	l stated for
task.	These standards should be shared with students and potential employers. A	record of

POSS

A. Cr B. Pro stude is rec

7.5 P

All ir each each student's progress should be maintained. The record should indicate tasks required for program completion and students should demonstrate competency of a task.

A. Rate the use of clearly stated performance levels for each task.

- B. Rate the availability of stated performance levels to students and potential employers.
- C. Rate the opportunity for students to demonstrate (practice) competency of a task before the instructor verifies a student's performance.
- D. Rate the use of a progress chart or other method (with specific tasks) to indicate students' progress.

POSSIBLE DOCUMENTS (paper or electronic records):

A. Provide a task sheet or other measurement tools.

B. Provide the evaluation criteria from the syllabus, progress chart, or task sheet.

C. Provide a task sheet or student progress chart.

D. Provide the school policy on student evaluation, sample of student progress chart, and use an actual record with student identifying information blocked out.

7.6 SAFETY STANDARDS

Safety instruction must be given prior to lab/shop work and be an integral part of the training program. A safety test must be included in the training program. Students and instructors should comply with personal and environmental safety practices associated with clothing; eye protection; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of chemicals/materials in accordance with local, state, and federal safety and environmental regulations.

A. Is safety instruction given prior to lab/shop work?	YES	🗌 NO	
B. Are safety tests given in the training program?	YES	NO	
POSSIBLE DOCUMENTS: A. Show an example of the safety test, course of study, course outline, poste B. Provide the course of study and sample of the safety test.	ers, etc.		
7.7 PERSONAL STANDARDS All training activities and instructional material should emphasize the impor high personal standards.	tance of maint	7.7 aining	
 A. Rate the emphasis placed on the following in all training activities ar instructional materials: 1. the importance of maintaining good relationships with fellow em 2. respect for fellow students' tools and other property 3. the development of good customer relations 4. appropriate clothing like that found in local shops 5. student cleanliness to ensure seats, steering wheels, etc. are not g or damaged after the job is complete 	nd Iployees reasy		
POSSIBLE DOCUMENTS: A. The evaluation team will conduct a visual inspection. Provide instructional materials, class / lab / shop rules.			
7.8 WORK HABITS/ETHICS The training program should be organized in such a manner that work habits required on the job are an integral part of the instruction.	s and ethical pr	7.8 ractices	
A. Rate the degree to which the training program develops work habits coincide with work habits required on the job.	that		
B. Rate the emphasis placed upon ethical practices.			

POSSIBLE DOCUMENTS: A. – B. The evaluation team will conduct a visual inspection. Describe attendance policy, etc.

7.9 RELATED INSTRUCTION

Instruction in related mathematics, science, communications, and interpersonal relations should be provided and coordinated with ongoing instruction in the training program.

A. Rate the degree to which related mathematics, science, communications, and interpersonal-relations instruction are integrated with instruction in the training program.

POSSIBLE DOCUMENTS:

A. Show syllabus with objectives and examples of tasks where related instruction is provided (Ohm's Law, Pascal's Law, gear ratio, etc.); SkillsUSA Professional Development Program, if appropriate.

7.10 TESTING

Both written and performance-based tests should be used to validate student competency. Students should be encouraged to take industry recognized certification tests, such as the ASE Entry-Level Certification or ASE Professional Certification tests.

- A. Rate the use of written tests to evaluate cognitive task performance.
- B. Rate the use of performance tests to evaluate manipulative task performance.
- C. Rate the use of an acceptable level of performance in cognitive and manipulative tests.
- D. Rate the degree to which students are encouraged to take accreditation tests that are industry recognized certification tests, such as the ASE Entry-Level Certification or ASE Professional Certification tests.

POSSIBLE DOCUMENTS:

- A. Show samples of written tests.
- B. Show sample job sheets.
- C. Show sample of the rating scale used.

D. Show posters, ASE test registration materials, student certificates of achievement, and/or describe provisions made for taking ASE tests.

7.11 EVALUATION OF INSTRUCTION

Instructional procedures should be evaluated in a systematic manner. This evaluation should be through regular reviews by students and the administration.

- A. Rate the use of student input/participation (survey) in the evaluation process of instruction.
- B. Rate the process used by administration to evaluate instructors.

POSSIBLE DOCUMENTS: A. – B. Provide an explanation of the overall program evaluation policy and plan. Show samples of the instructor evaluation instrument, etc.

7.10

7.12 ON-VEHICLE SERVICE AND REPAIR WORK

On-vehicle service and repair work should be scheduled to benefit the student and supplement ongoing instruction on items specified in the task list. A student should have had instruction and practice on a specific repair task before on-vehicle service and repair work requiring that task is assigned. Vehicles donated by the manufacturers or other sources, customer-owned vehicles, and other training vehicles may be used as the primary source of on-vehicle service and repair work. Training program student-owned vehicles, school buses, and other vehicles owned and operated by the governing body of the school must not be the primary source of on-vehicle service and repair work vehicles. All vehicles in the lab/shop should have a completed industry-type work order attached to or on the vehicle.

- A. Rate the availability of on-vehicle service and repair work that benefits the student and supplements on-going instruction.
- B. Rate the degree to which a student had instruction and practice on a specific repair task before on-vehicle service and repair work is assigned.
- C. Rate the degree to which the program policies <u>do not allow</u> the following as the primary source of on-vehicle service and repair work:
 - 1. students in the collision repair & refinish technician training program working on their own vehicles
 - 2. school buses or other vehicles owned and operated by the governing body of the school.

(NOTE: VEHICLES DONATED BY MANUFACTURERS OR OTHER SOURCES ARE ACCEPTABLE AS THE PRIMARY SOURCE OF ON-VEHICLE SERVICE AND REPAIR WORK.)

D. Rate the use of a written, industry type work order attached to or placed inside the vehicle.

POSSIBLE DOCUMENTS:

A. Show task sheets and repair orders. The evaluation team will conduct a visual inspection. B. Show course of study and a copy of the student task sheets, lab sheets, or progress charts, or

work order.

C. Provide a copy of the program policy.

D. Show a sample work order. The evaluation team will conduct a visual inspection.

7.13 CUSTOMER VEHICLES

A systematic method of collecting, documenting, and disbursing customer vehicle work repair receipts should be used. Instructional staff should not be required to collect payment for customer vehicle work repairs. (This applies only to programs that accept customer vehicles for instruction.)

Page 33 of 45

POSSIBLE DOCUMENTS: A. - B. This applies only to programs that use customer vehicles. Show the policy statement on collecting, disbursing, and accounting for funds.

7.14 ARTICULATION

Agreements between programs with equivalent competencies should be used to eliminate unnecessary duplication of instruction and foster continued study.

A. Rate the articulation agreements used between programs with equivalent competencies to eliminate unnecessary duplication of instruction.

POSSIBLE DOCUMENTS: A. Show copy of the articulation agreement. Note: this may be N/A if there are no articulation agreements in place.

For items rated above or below a 4 – provide explanation below:

Standard 7 Average Score (as many as 35 items)

STANDARD 8 – TOOLS & EQUIPMENT

TOOLS AND EQUIPMENT USED IN THE COLLISION REPAIR & REFINISH TECHNICIAN TRAINING PROGRAM MUST BE OF THE TYPE AND QUALITY FOUND IN THE REPAIR INDUSTRY AND MUST ALSO BE THE TYPE NEEDED TO PROVIDE TRAINING TO MEET THE PROGRAM GOALS AND PERFORMANCE OBJECTIVES.

8.1 SAFETY

Equipment and tools used in the training program must have all shields, guards, and other safety devices in place, operable, and used. Safety glasses must be worn by all students, instructors, and visitors in the lab/shop area while lab is in session.

- A. Are all shields, guards, and other safety devices in place, operable, YES and used? (GO/NO GO REQUIREMENT)
- **B.** Do all students, instructors, and visitors comply with safety practices and wear safety glasses in the lab/shop area while lab is YES in session? (GO/NO GO REQUIREMENT)

POSSIBLE DOCUMENTS: A.- B. The evaluation team will conduct a visual inspection.

8.2 QUANTITY AND QUALITY

The tools and equipment used in the training program should reflect the program goals and performance objectives. Sufficient tools and equipment should be available for the training offered. The tools and equipment should meet industry quality standards.

A. Are the tools and equipment available for the tasks being taught for the level of accreditation being requested?

YES

8.1

NO

7.14

N/A

B. Rate the quantity of tools and equipment in terms of the quantity needed for efficient and effective instruction. C. Rate the tools and equipment used in terms of meeting industry quality standards. 8.3 A. Rate the consumable supplies in terms of availability to assure continuous instruction. **POSSIBLE DOCUMENTS:** A. The evaluation team will conduct a visual inspection. Provide inventory sheets and describe replenishment procedure. **8.4 PREVENTIVE MAINTENANCE** 8.4 A. Rate the use of a preventive maintenance schedule to minimize equipment down time. **POSSIBLE DOCUMENTS:** Provide a copy of the preventive maintenance schedule or spreadsheet. See example document in **Resources** section of ASE Education Foundation website.

8.5 REPLACEMENT

An annual review process should be used to maintain up-to-date tools and equipment at industry and safety standards. Graduate follow-up surveys and Advisory Committee input should be used in this process.

A. Rate the use of an annual review process, including the use of graduate follow-up information to maintain up-to-date tools and equipment at industry and safety standards.

POSSIBLE DOCUMENTS: A. Describe the annual review process and provide an example from the annual survey data.

POSSIBLE DOCUMENTS:

A. The evaluation team will conduct a visual inspection. Provide a copy of the tool inventory & location.

B. The evaluation team will conduct a visual inspection of class size and inventory.

C. The evaluation team will conduct a visual inspection of tools and equipment used to meet industry quality standards.

8.3 CONSUMABLE SUPPLIES

Sufficient consumable supplies should be readily available to assure continuous instruction.

A preventive maintenance schedule should be used to minimize equipment down-time.

8.6 TOOL INVENTORY AND DISTRIBUTION 8.0 An inventory system should be used to account for tools, equipment, parts, and supplies.	5
A. Rate the use of an inventory system to account for tools, equipment, parts, supplies and the process of disbursing tools to students.	
POSSIBLE DOCUMENTS: A. Provide the inventory list and describe how tools are disbursed and/or signed in/out to students.	
8.7 PARTS PURCHASING8.A systematic parts purchasing system should be in place.	7
A. Rate the use of a systematic parts purchasing system.	
B. Rate the efficiency of acquiring parts for task performance.	
POSSIBLE DOCUMENTS: A. If purchasing parts, provide a written procedure or parts request form. B. The evaluation team may discuss this issue with instructor.	
8.8 HAND TOOLS 8. Each student should have access to basic hand tools comparable to tools required for employment. Students should be encouraged to purchase a hand tool set during the period of instruction.	8
A. Rate the availability of hand tools for students' use during lab/shop instruction, comparable to the tools that will be required for employment.	
B. Rate the emphasis placed on encouraging students to purchase a hand tool set (during the period of instruction) which is appropriate to the level in which they are being trained.	
POSSIBLE DOCUMENTS:A. Provide an inventory. The evaluation team will conduct a visual inspection.B. Explain policy and provide information available for students detailing recommended tool list and vendor visits.	
For items rated above or below a 4 – provide explanation below:	

Standard 8 Average Score (as many as <mark>10</mark> items)

STANDARD 9 - FACILITIES

THE PHYSICAL FACILITIES MUST BE ADEQUATE TO PERMIT ACHIEVEMENT OF THE PROGRAM GOALS AND PERFORMANCE OBJECTIVES.

9.1 TRAINING STATIONS

Training stations (bench and on-vehicle service and repair work) should be available in the type and number required for the performance of tasks outlined in the program goals and performance objectives.

- A. Rate the training stations available in the type and number required for task performance as outlined in the program goals and performance objectives in terms of:
 - 1. adequate bench space
 - 2. adequate lab/shop space

POSSIBLE DOCUMENTS: A. The evaluation team will conduct a visual inspection. Provide information on class size for each course.

9.2 SAFETY

The facilities should meet all applicable safety standards and an emergency plan should be in place and posted in all classrooms and lab/shop areas.

- A. Rate the identification of hazardous areas (painting, welding, etc.) with signs.
- B. Rate the fire extinguishers in terms of having regular, current inspection tags attached and meeting fire codes for different types of fires.
- C. Rate the availability of an electrical disconnect system or posted procedure to shut down all outlets in case of an emergency.
- D. Rate the lighting in terms of being adequate for task performance and safety.
- E. Rate safety inspections in terms of being regularly held.

F. Rate the degree to which a functional eye wash station is available.

POSSIBLE DOCUMENTS:

A. -F. The evaluation team will conduct a visual inspection of the location of signs, fire extinguishers, posted policy/procedures, lighting, inspection schedule, applicable safety standards, and eye wash stations.

9.3 FACILITY MAINTENANCE

A written maintenance program policy should exist to ensure facilities are suitable for instruction.

A. Rate the use of a written facility maintenance procedure to ensure suitability for instruction.

POSSIBLE DOCUMENTS: A. Provide copy of written policy or procedures.

9.1

9.2

9.4 HOUSEKEEPING

9.5 OFFICE SPACE

use as an office.

an office.

Storage areas for tools, parts, supplies, and automobiles should be sufficient to support the activities outlined in the program goals and performance objectives. Security should be provided to prevent pilferage and vandalism.

A.	Rate the storage area for specialized tools in terms of being adequate to support
	the activities outlined in the program goals and objectives.

- B. Rate the storage area for parts and supplies in terms of being adequate to support the activities outlined in the program goals and performance objectives.
- C. Rate the storage area for vehicles in terms of being adequate to support the activities outlined in the program goals and performance objectives.
- D. Rate the storage area in terms of being provided for student toolboxes.
- E. Rate the security from pilferage and vandalism of the storage areas.

POSSIBLE DOCUMENTS: A. – E. The evaluation team will conduct a visual inspection.

9.7

 \Box N/A

9.8 SUPPORT FACILITIES

Clean-up areas should be provided for both male and female students and should be convenient to	
he instructional area.	

A. Rate the area provided for clean-up after lab/shop activities in terms of being conveniently located.

POSSIBLE DOCUMENTS: A. The evaluation team will conduct a visual inspection.

9.9 VENTILATION

An exhaust fume removal system shoul	d be in place and o	operational.	When appropriate, heating
and cooling systems should be used to	provide sufficient	comfort for	learning.

- A. Rate the exhaust fume removal system in terms of being in place and operable.
- B. Rate the heating and cooling systems in terms of providing sufficient comfort for learning.

POSSIBLE DOCUMENTS:

A. The evaluation team will conduct a visual inspection and verify the function of exhaust fume removal system.

B. The evaluation team will interview instructors and students.

9.10 FIRST AID <mark>KIT</mark>

If allowed by school policy, a first aid kit should be in place and should be maintained and comply with local regulations.

A.	If allowed, rate the first aid kit in te	erms of being equipped with	th
	basic, up-to-date first aid supplies.	If not allowed, mark N/A.	□ N/A

POSSIBLE DOCUMENTS: A. Provide copy of the written policy. The evaluation team will conduct a visual inspection if a first aid kit is allowed.

STANDARD 10 - INSTRUCTIONAL STAFF

THE INSTRUCTIONAL STAFF MUST HAVE TECHNICAL COMPETENCY AND MEET ALL STATE AND LOCAL REQUIREMENTS FOR CERTIFICATION/CREDENTIALS.

10.1 TECHNICAL COMPETENCY

Instructors must hold current ASE certification in each collision repair and refinish areas they teach, and which is being evaluated for program accreditation. (GO/NO GO REQUIREMENT)

How many instructors teach in this program?

- A. Do all instructors hold current ASE certification in the collision repair & refinish area(s) they teach?
 - 1. B2 Painting & Refinishing
 - 2. B3 Non-Structural Analysis & Damage Repair
 - 3. B4 Structural Analysis & Damage Repair
 - 4. B5 Mechanical & Electrical Components

POSSIBLE DOCUMENTS: A. Provide information on each instructor, diplomas earned, and copy of ASE Certification.

10.2 INSTRUCTIONAL COMPETENCY

Instructors should meet all state, local, or institutional teaching requirements.

A. Rate the degree to which all instructors meet all state, local, or institutional teaching requirements.

POSSIBLE DOCUMENTS: A. Provide a copy of the teaching certificate, or equivalent, for each instructor.

10.3 TECHNICAL UPDATING

Faculty members should be provided technical materials required to maintain their competency. Instructors must complete a specified minimum amount of technical update training each year.

Collision Repair/Refinish instructors may substitute ten (10) hours of documented hands-on work <u>as a technician</u> in a retail or fleet collision repair business outside the school (e.g., part-time work or summer externship) for one (1) hour of update training, up to a maximum of ten (10) hours of update training each year, toward the annual update training requirement. The work must be related to the areas they teach and take place in the same year for which substitute credit is sought.

- A. Rate the availability of automotive trade publications, service bulletins, and other materials needed to maintain technical competence for the instructional staff.
- B. Do all instructors attend a minimum of 20 hours per year of recognized industry update training (or equivalent) relevant to the program? (GO/NO GO REQUIREMENT)

YES NO

10.2

10.3

POSSIBLE DOCUMENTS:

A. Provide a copy of the inventory of trade publications, service bulletins, etc. The evaluation team will conduct a visual inspection.

B. Provide certificate, transcript, or completion forms for each instructor. For hands-on work equivalent, provide the Hands-on Work Report, with detailed description of work performed and signed by employer.

10.4 SUBSTITUTES

10.4

A written policy or procedure regarding the use of "substitute" instructors should exist and be provided to all instructors.

A. Rate the degree to which instructors receive a written policy or procedure regarding the use of substitutes.

POSSIBLE DOCUMENTS: A. Provide written policy or procedure on substitute teachers.

For items rated above or below a 4 – provide explanation below:

Standard 10 Average Score (<mark>3</mark> items)

STOP!

THE NEXT TWO STANDARDS ARE <u>OPTIONAL</u>. YOU SHOULD ONLY COMPLETE STANDARDS 11 AND/OR 12 IF ADDITIONAL PROGRAM HOURS ARE NEEDED TO MEET MINIMUM HOUR REQUIREMENTS.

STANDARD 11 – WORK-BASED LEARNING

WRITTEN POLICIES AND PROCEDURES SHOULD BE USED FOR ALL PROGRAM-SANCTIONED WORK-BASED LEARNING AND APPRENTICESHIP ACTIVITIES. (This standard applies only to programs that are using work-based learning or apprenticeship training to meet minimum program hour requirements.)

* A maximum of 25% of the instructional-hours requirement may be met by applicable work-based learning activities, e-learning activities, or a combination of both work-based learning and e-learning activities.

Will work-based learning be used to meet the minimum hour requirements for	
accreditation? If not, skip the rest of standard 11.	

11.1 STANDARDS

The work-based learning component must be an integral part of the automotive program and available to all students. Students spend part of the scheduled time, either on a daily basis or in a block-time configuration, on-site in related classroom instruction and part of the scheduled-time off-site in a related and structured work environment.

A. Rate the use of a training plan and performance standards a student will be expected to meet in terms of being developed and coordinated by the collision repair & refinish instructor.

POSSIBLE DOCUMENTS: A. Show overall work-based or apprenticeship plan, sample training plan, and the evaluation team will talk with instructor. This may be N/A.

11.2 AGREEMENTS

All legally binding agreements should be written and signed by the student, the student's parent (*if the student is under 18 years of age*), the employer and the program instructor or the institution's designated work-based learning coordinator.

A. Rate the use of all agreements between the institution and the work location in terms of being written and legally binding.

POSSIBLE DOCUMENTS: A. Show a sample agreement. This may be N/A.

11.3 SUPERVISION

A supervising collision repair & refinish instructor or supervising work-based learning coordinator should be assigned responsibility, authority, and time to coordinate and monitor collision work-based learning components.

A.	Rate the use of a collision repair instructor or supervising coordinator	
	assigned the responsibility, authority, and time to coordinate and	
	monitor work-based learning automotive programs.	N/A

11.1

N/A

11.2

POSSIBLE DOCUMENTS: A. Show written policy on supervision, identify the person responsible for supervision; the evaluation team should interview the person who supervises workbased learning or apprenticeship. This may be N/A.

For items rated above or below a 4 – provide explanation below:

Standard 11 Average Score (as many as 3 items)

STANDARD 12 – E-LEARNING

WRITTEN POLICIES AND PROCEDURES MUST BE FOLLOWED WHEN E-LEARNING CURRICULAR MATERIALS ARE USED OUTSIDE OF SCHEDULED

CLASSROOM/LAB/SHOP TIME. (This standard only applies to programs that are using e-learning to meet program hour requirements. This is a go/no go Standard that requires validation of a 'yes' response to each of the criterion.)

* A maximum of 25% of the instructional-hours requirement may be met by applicable work-based learning activities, e-learning activities, or a combination of both work-based learning and e-learning activities.

Will e-learning be used to meet the minimum hour requirements for accreditation? If not, skip the rest of standard 12.

12.1 ACCESS

Students must have access to the appropriate technology needed to access e-learning materials.

A. Is there documentation that students have access to appropriate technology for e-learning purposes? (GO/NO GO

POSSIBLE DOCUMENTS: A. Provide a copy of the policy regarding the availability of appropriate technology for students to access e-learning instructional materials

12.2 CURRICULUM AND STUDENT PROGRESS

All content/tasks taught by e-learning must be identified and a record of each student's progress must be maintained through the use of a Learning Management System (LMS).

- A. Are the content/tasks that are to be delivered via e-learning clearly highlighted in the Course of Study? (GO/NO GO REQUIREMENT) YES
- **B.** Is there documentation that e-learning is incorporated into the content/tasks in the program plan? (GO/NO GO REQUIREMENT)

NO

Effective 1/1/2022 Revised 1/11/2022

N/A

12.2

N/A

12.1

NO

YES

- C. Do the instructional hours to be credited toward meeting up to 25 percent of the program specialty hour requirements correlate with the vendor's average completion time for each instructional module? (GO/NO GO REQUIREMENT)
- D. Is there documentation of the implementation and use of elearning instructional materials as evidenced in a Learning Management System (LMS)? (GO/NO GO REQUIREMENT)

POSSIBLE DOCUMENTS:

A. Highlight e-learning activities in the course of study materials.

B. Cross-reference e-learning activities to content/tasks in the program plan.

C. Correlate instructional hours to be credited toward meeting up to 25 percent of the program specialty hour requirements with the vendor's average completion time for each instructional module.

D. Show an example of the Learning Management System (LMS) used to track student progress.

12.3 ADVISORY COMMITTEE INPUT

E-learning, for the purpose of meeting the hour requirements, should be discussed and approved by the Advisory Committee.

A. Are Advisory Committee meeting minutes available to confirm that the committee has discussed e-learning? (GO/NO GO **REOUIREMENT**) YES NO

POSSIBLE DOCUMENTS: A. Highlight pertinent information in the Advisory Committee meeting minutes.
