

AUTOMOTIVE EDUCATION PROGRAM

Automotive Technologies for Students and Instructors

We want to help your students develop professional skills they can use in the bay and earn some cool stuff at the same time

Register your class and when five of your students complete level 1, we'll send you material to outfit your classroom like posters, counter mats, decals, magnetic shop screwdrivers, and more.

Register your class now

To our valued Automotive Education partner,

Thank you for all you do to educate the next generation of automotive technicians! In an effort to support you and your students, Standard Motor Products has developed the Automotive Education Program (AEP). This special program invites you to utilize AEP training and earn gifts for your students and your classroom.

AEP Level 1 kicks off with a series of 4 videos and a quiz that explores ignition coil testing, tips, and issues. Once a student views the videos and successfully passes the quiz, they will be awarded a certificate and a gift package. When 5 of your students successfully complete the course, we'll send you material to help outfit your classroom.

Once your class has completed level 1, we'll grant you access to 10 of our Pro Training On-Demand videos and corresponding downloadable handouts. Many instructors use these in the classroom, virtual classroom, or assign students to watch on their own.

Here's how it works. Go to www.SMPAutoEducation.com and create your instructor account. The system will generate a unique URL and instructor code that's tied to you specifically. Send this invitation link to your students (you will be sent an email to forward to your students or you can use the Instructor Dashboard to enter your students' email addresses). Students will use this link to log in, register and access the material as part of your unique classroom. The Instructor Dashboard allows you to manage your class and view your students' progress. If you have any difficulties during registration, please contact AEP@smppcorp.com.

We hope you find the SMP® Automotive Education Program a beneficial tool to assist you in your classroom. We appreciate your work and look forward to help you educate the technicians of the future. We will be adding new topics to our AEP program in the future, so continue to check in each semester.

Thank you for all you do,

Ryan Kooiman

Director of Training

Standard Motor Products, Inc.

www.SMPAutoEducation.com

With over 100 years in business, Standard Motor Products, Inc. is a leading independent manufacturer and distributor of professional automotive engine management and temperature control replacement parts in the aftermarket's most respected brands. Developing and providing world-class, award-winning training for automotive technicians is one of our core values. For more information, download the SMP® Parts App or visit SMPcorp.com.
