

ASE Accredited Programs:

Shaping the service professionals of tomorrow

Education Foundation

A non-profit organization since 1984

We're committed to bridging the gap between students and the transportation industry. We develop relationships between schools, shops and partners to elevate service professionals and better serve the motoring public.

118,000 Students

in ASE Accredited Programs

148,864 Passes

on Entry-Level tests

1,800 Schools

with ASE Training Programs

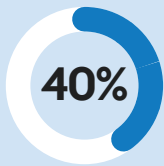

9,000 Employers

connected with schools

ASE Certified techs help raise the bar across the board.

Trust the seal. See the numbers behind the gear.

Better Shop Productivity

More efficient project completion*

Fewer Comebacks

Work is done correctly the first time

Lower Employee Turnover

Reduces training and recruitment costs

Higher Earnings

Make ASE Certifications a valuable investment

**Based on national data studies in conjunction with a top five auto care chain, and data provided by over 34,000 self-reported professionals.*

Delivering value for everyone across the industry

OEMs

Shops

Schools

Students

Technicians

Accreditation

Standards for auto, diesel, and collision programs ensuring students career readiness.

Certification

The gold standard of transportation industry certifications since 1972.

Collaboration

ASE is the conduit between all stakeholders across the transportation industry.

The Challenge

Too many programs only provide hobby-level skills

Shops need more qualified entry-level technicians

- Existing programs have not kept up with new technology
- Curriculum is not aligned with local employer current needs
- Students still need to develop career-ready skills to get hired

The Solution

We close the gap between education and industry

ASE Education Foundation training program accreditation

- Advisory Committee of local business owners and managers collaborate with schools
- Schools receive support and guidance on what is really needed in the workforce
- Programs improve with better training resources, mentoring, guest speakers, and more

National Standards with a Local Approach

- Determined by industry, customized for local business needs
- Standards evolve as vehicle and service technology changes
- Accreditation ensures education and industry work together

The Results: How Everyone Benefits

Students

- Opportunities for work-based learning, job shadowing, apprenticeships, etc.
- Gain skills and credentials that prepare them for successful careers

Employers

- Creates a talent pipeline
- Internships provide long-term "test drives" for potential hires
- Be recognized as a business partner in the local school community

Schools & Instructors

- Objectives match skills needed for employment
- Instructors stay current with relevant training
- Industry support provides resources to improve programs
- Graduates are well-qualified and quickly placed

Vehicle Owners & Drivers

- Vehicles are better maintained
- Owners get cars and fleets serviced quickly and correctly
